

CTX-1455AW Citrix Access Suite 4.0: Common Platform Administration

This course introduces Citrix® administrators and IT professionals to common features of the management platform for Citrix Access Suite products. Learners are introduced to the Access Suite from a business benefit perspective and then learn what common technical features enable those benefits. Learners continue with an introduction to the Access Management Console, including guided practice on selected capabilities. This course concludes by preparing administrators to install, administer and support the Citrix License Server, as well as to address license issues common across the Access Suite products.

Audience

This course is intended for Citrix administrators and IT professionals familiar with Microsoft® Windows Server™ 2003 environments. Systems engineers, analysts, consultants, architects and Citrix accessPARTNER network members are also appropriate candidates for this course.

Preparatory Recommendations

None
